Santacruz(E), Mumbai- 400098

RPA Question Bank

Unit 1 Ch 1. What is Robotic Process Automation?

1. Where is the word "Automation" derived from? What does it mean?
2. List out what are the tasks can be automated and what should be automated.
3. List & Explain the techniques available for automation.
4. Explain in brief about RPA
5. What are the Potential Industries for Implementation of RPA?
6. What are the Potential Benefits of RPA?
7. Explain the core components of RPA platforms
8. Give an account of the RPA platform UI Path

Unit 1 Ch 2. Record & Play

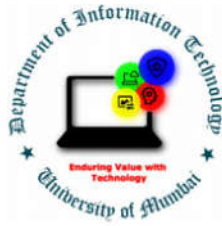

1. Explain the difference between UiPath Enterprise & Community Editions
2. List and explain the basic components in UiPath RPA Platform.
3. Explain in detail about UiPath Orchestrator.
4. What are the two types of robots in UiPath?
5. Explain the following types of UiPath Projects: Process or Library
6. Explain the types of workflows in UiPath
7. Explain the UiPATH Studio Interface with respect to following components:
 1. Ribbon menu
 2. Designer Panel
 3. Project /Activities & Snippets Panel
 4. Properties, Outline Panel & Object Repository panel
 5. Variable, Argument & Import panel
 6. Output, Find References & Breakpoints panel
8. Explain Recorder in UiPath with respect to the following points:
 - a. What is Task Recorder?
 - b. Explain Manual & Automatic Recording
 - c. What are Recordable & non-recordable actions?
9. Explain the following types of recordings available in UiPath Studio:
 - a. Basic
 - b. Desktop
 - c. Web
 - d. Image
 - e. Native Citrix
 - f. Computer Vision

Unit 2 Ch 3: Sequence, Flowchart, and Control Flow

1. What is a Sequence? Explain with an example of how to build a Sequence in UiPath Studio.
2. What are activities in UiPath? Give example of any three activities.
3. What is extracting a workflow in UiPath? Why is it done? Explain with an example of how to build and extract a workflow in UiPath Studio.
4. What Flowcharts are and when to use them? Explain with an example of how to create a flowchart in UiPath Studio.
5. What is control flow in UiPath Studio? List the different types of control flow activities in UiPath.
6. Explain with example the following control flow activities in UiPath:
 - a. The Assign activity
 - b. The Delay activity
 - c. The Break activity
 - d. The While activity
 - e. The Do While activity
 - f. The For each activity
 - g. The If activity
 - h. The Switch activity

Unit 2 Ch 4: Data Manipulation

1. Explain variable & scope of a variable with respect to UiPath. How to create a variable and set its scope in UiPath?
2. Explain the different variable categories in UiPath with example.
3. Explain arguments in UiPath
4. What is an argument in UiPath? Explain its direction property.
5. What is data scraping? How is a data table used in data scraping?
6. Explain Clipboard Managements and activities involved
7. Explain the Read Cell, Write cell activities in UiPath with example
8. Explain the Read Range activity in UiPath with example
9. Explain the Write Range activity in UiPath with example
10. Explain the Append Range activity in UiPath with example
11. Explain the difference in Write Range & Append activities in UiPath
12. Explain the steps involved in reading data from one excel file and writing to another one in UiPath

Department of Information Technology

Dr. Shankar Dayal Sharma Bhavan, 3rd Floor, Vidyanagari,
Santacruz(E), Mumbai- 400098

Unit 3 Ch 5: Taking Control of the Controls

1. Explain the difference between find element & element exists activities in detail
2. Explain with a single example the use of attach window & indicate on screen activities
3. Explain the use of find children activity
4. Explain the techniques to wait for a control
5. Explain the following activities: Click & Double Click
6. Explain the following activities: Send hotkey & Type into activity
7. Explain the use of type secure activity with an example
8. Explain the UiExplorer in detail
9. List the different types of triggers & explain each in one line each
10. Explain the use of Monitor events/Trigger scope activity
11. List & Explain the element triggering events
12. List & Explain the system triggering events
13. Explain the difference between basic recorder & web recorder
14. Explain the steps involved in data scrapping information of mobile phones on a fleecart webpage specifically for name, memory, battery, camera, processor, price
15. What is screen scrapping? Explain the types of scrapping methods.
16. Explain in brief OCR
17. Explain how to extract text from a scanned document using OCR in UiPath

Unit 3 Ch 6: Taming that application with plugins and extensions

1. Explain the following types of plugins/extension:
 - a. Terminal plugin
 - b. Java Plugin
 - c. Mail Package
 - d. PDF Plugin/Package
 - e. Excel Plugin
 - f. Word Plugin
 - g. Browser Plugins/extensions
2. Explain in brief SAP automation using UiPath
3. Explain in brief citrix automation using UiPath
4. Explain the use of Send SMTP Mail Message activity
5. Explain in brief web integration and methodologies used
6. List and explain the activities under Credential management

Unit 4 Ch 7: Handling User Events & Assistant Bots

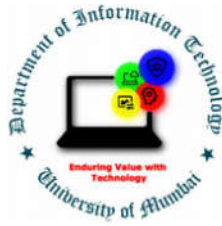

1. Explain types of robots in UiPath
2. Explain assistant bot with an example
3. List & Explain the system triggering events
4. Explain the click image trigger
5. Explain the task of a sending an email using assistant bot
6. Explain the blocking of an event
7. Give an example of launching an assistant bot on a keyboard event

Unit 4 Ch 8: Exception Handling, Debugging & Logging

1. What are exceptions? What is Exception Handling? How do we do it?
2. Explain try catch activity with an example
3. List common exceptions and suggest ways to handle them
4. Explain logging in UiPath.
5. Explain debugging techniques in UiPath
6. What are crash dumps? How are crash dumps collected in UiPath?
7. How are errors reported in different types of UiPath setups?

Unit 5 Ch 9: Managing & Maintaining the Code

1. Explain the following types of project layouts in UiPath:
 - a. Blank Project
 - b. Simple Process
 - c. Agent improvement Process
 - d. Transactional Business Process
2. What is the difference between the types of projects: process & library
3. Explain the advantage of breaking the project into smaller parts
4. Why should we use Exception Handling while creating automations?
5. What can be done to make the workflow more readable?
6. Explain nesting of workflows with example
7. Explain use of invoke workflow file activity with example
8. Explain the difference between workflow and templates
9. Explain state machines in detail
10. Explain when to use sequence, flowchart or state machines while automating
11. Write a short note on config files in UiPath
12. Write a short note on using TFS server in UiPath

Department of Information Technology

Dr. Shankar Dayal Sharma Bhavan, 3rd Floor, Vidyanagari,
Santacruz(E), Mumbai- 400098

Unit 5 Ch 10: Deploying & Maintaining the bot

1. Write a short note on orchestrator in UiPath
2. Explain publishing a workflow using publish utility
3. Give an overview of the orchestration server
4. Explain Queues with respect to UiPath Orchestrator
5. Explain Assets with respect to UiPath Orchestrator
6. Explain Process with respect to UiPath Orchestrator
7. Explain use of Orchestration server to control bots
8. Explain the step to deploy bots using Orchestration server
9. Write a note on publishing and managing updates in UiPath Orchestrator
